DETAILED ACTION

1. Applicant's election claims of 1-3, 6-8, and 32-39 filed November 23, 2005 is acknowledged and entered. The restriction of claims 4 and 5 is withdrawn and is made final since the invention of claims 9-31 is patentably distinct from the inventions of claims 1-8 and 32-39. Applicant is kindly reminded that claims 9-31 must be cancelled when this application goes to issue.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 7, 8, 32, and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Fournier et al. (US Patent 5,647,328).

Fournier et al. shows a fuel pump module 10 comprising a reservoir 26, a high pressure fuel pump 14 having an inlet 16 communicating with the reservoir and having an outlet 42, a nozzle having an outlet in fluid communication with the outlet of the high pressure fuel pump as recited, and a restrictor plate 30 received between the outlet of the fuel pump and the outlet of the nozzle, the restrictor plate having an orifice 90 restricting the flow of fuel flowing to the nozzle. The reservoir further comprises an inlet 98 and a first venturi 28 spaced from the nozzle generally between the nozzle and the inlet of the reservoir as recited in claim 3. Fournier et al. also shows a return fuel line 94 as recited in claim 7.

Allowable Subject Matter

4. Claims 4-6 and 34-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Bucci et al. is pertinent to Applicant's invention.
